

日中韓国際シンポジウム
Japan-China-ROK Symposium
3 カ国からみるイノベーション政策の現状と展望
Current Issues and Expectations on Innovation Policy in Three Countries

1. Objectives

Even though the three leaders (Japan, China and ROK) echoed the voice of the importance of innovation, the prospective on the innovation of each country differs to each other in every dimension. Each innovation policy in three country, which are China's mass entrepreneurship and innovation policy, Japan's innovation policy, and ROK's creative economy policy, has different meanings. To exchange the view point of what and how the innovation is growing interest and concern for the three countries especially in industry sectors and government, the Symposium aims to promote the significance of CJK innovation, to share current trend of innovation such as industry 4.0, and to raise public awareness.
